

William James Purcell

New York, NY – (978) 460-0023 – wjpurcell27@gmail.com

I am a deployed engineer with over 12 years of experience building at the intersection of engineering and the customer. I design and ship full-stack applications, autonomous AI agent systems, and data pipelines for enterprise customers translating business requirements into production-ready solutions. I thrive in roles where I'm building while collaborating directly with customers and stakeholders. I have extensive experience in technical customer-facing roles and several years of experience programming.

Skills

Code: TypeScript, JavaScript, React, Node.js, Python, Fastify, Express, SQL (D1/SQLite, MySQL), Vite, Tailwind CSS, Chart.js, Git, Docker, Cloudflare Workers/D1, Salesforce (SOQL), Version Control

Customer: Custom Builds, Implementation, Support, Sales, Scoping, Project Design, Proof of Concept, Solution Development

Experience

Writer New York, NY – *Senior Deployed Engineer* – January 2025 - Present

Build and ship AI-powered applications, autonomous agent systems, and full-stack applications for enterprise customers on the Writer platform. Primary technical owner of 15+ customer engagements across financial services, healthcare, and media.

- Architected a multi-agent account reporting system with parallel child agent dispatch, cross-platform data aggregation (Slack, Gong, Salesforce, Omni), and automated delivery to a live interactive dashboard (React, Fastify, Cloudflare D1, Chart.js)
- Developed a production product data enrichment agent for Henry Schein using AI vision to extract product catalog attributes from product images and PDFs, with single-product API and multi-product batch orchestration
- Built a campaign lifecycle dashboard for Nasdaq tracking campaigns with connected playbook agents automating content generation (React, TypeScript, Fastify, SQLite)
- Delivered 15+ custom agent builds across JPMC, Vanguard, Nasdaq, American Eagle, and others spanning compliance, RFP automation, and content generation

Amplitude New York, NY - *Senior Strategic Solutions Consultant* – November 2018 - June 2023

Joined as an IC on a startup team of ~150 people, growing into a Senior Strategic lead of our NYC Solutions Engineering team to a company of ~700 through to a public event, with AMPL now listed on Nasdaq

- Senior member of Amplitude's east coast enterprise technical sales, technical customer support, and data ingestion (SDK, ETL) for customers including Fox, Vimeo, CNBC, Fidelity, Discovery, and Under Armour
- Product & implementation specialist (data integration, POC, product demos)
- Managed internal data backfill system (Python) & developed custom ETL pipeline system (Python, React, JavaScript) using the Amplitude HTTP API reducing time to POC by ~20%

Chartbeat New York, NY - *Senior Solutions and Sales Engineer* – September 2015 - October 2018

A combination of pre and post-sales technical implementation, support, and troubleshooting. Owned and maintained our Video product codebase (Python, JavaScript). Primary technical contact for our most strategic customers

- Solutions department team lead, managing and mentoring direct reports
- Technical relationships, product implementation (JavaScript, mobile SDKs, Java, Swift)

Blacklight Media New York, NY - *Business Analyst* – January 2013 - June 2015

Business analyst responsible for statistical analysis and presentation of marketing performance data. Built, maintained, and managed automated systems for ingesting and storing marketing data. Stood up our MySQL database and managed QA

- Database management, scripting and automation (Python, MySQL)
- Data analysis, Tableau workbook design and management

Education

University of Vermont BA: Philosophy, BA: Computer Science – Class of 2009

Barcelona Code School Barcelona, Spain – October 2023 - January 2024
